Portfolio: byalisherov.netlify.app

PROFILE

Frontend Developer focused on building clean, responsive, and user-friendly web interfaces. I work primarily with HTML, CSS, SCSS, JavaScript, and React. Over the past year, I have built personal and freelance-oriented projects to strengthen my practical development skills and create real-world portfolio work.

TECHNICAL SKILLS

HTML • CSS • SCSS • JavaScript • React

EXPERIENCE

Independent Frontend Developer | *Freelance & Personal Projects*

- Around 1 year of hands-on experience developing frontend projects independently.
- Built portfolio websites, landing pages, and startup-oriented web projects from scratch.
- Focused on responsive layouts, clean UI implementation, and practical frontend development.

SELECTED PROJECTS

RavonPay — Frontend project for a digital payment platform concept.

ChegaraMap — Frontend project focused on interactive land-boundary and map-based functionality.

MuzlaPay — Frontend project for a payment-related digital product concept.

Landing Pages — Several independently designed and developed landing pages for different concepts and use cases.

EDUCATION

103 Public School | Secondary Education

Completed 11 years of school education.
